Carbon rapidly synchronizes SAP® and project planning systems

SAP - Primavera Integration

Improve Project Performance

SAP ERP and Primavera P6 are effective tools on their own, but work better and faster when they share an up-to-date dataset.

SAP *SAP ECC or SAP S/4HANA*

Integrate

A simplified and open architecture enables flexible SAP ERP - Primavera P6 integration
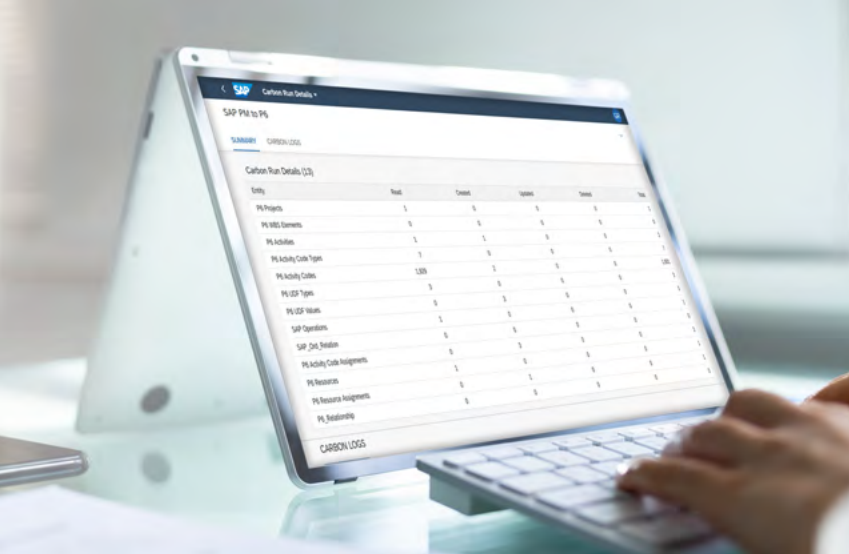

Accelerate

SAP HANA's in-memory performance improves sync times for large volumes of data and ensures project information is always up to date

Automate

Set selection parameters to enable automatic or on-demand synchronization

SAP ERP and Primavera play key roles in these high-impact business scenarios:

Routine Maintenance and Service Management

Shutdowns, Turnarounds and Outages (STO)

Capital Construction Projects

IT Projects

Carbon Benefits

Synchronize project information in near real-time

Achieve reliable, rapid data exchange between SAP ERP and Primavera using the power and speed of SAP HANA.

Improve planning, scheduling, and forecasting

Enable better planning and scheduling for STOs, capital construction, routine maintenance, and IT projects.

Expedite decision-making

Make waiting on system sync times a thing of the past. Updated project information helps you quickly identify project gaps and make timely and effective decisions.

Improve cash flow predictability

Synchronized SAP ERP and Primavera data enables Finance teams to better predict project cash flows and provide accurate reports.

Multi-system Support

- SAP ECC versions 4.7 and higher

- SAP S/4HANA on-premise

- SAP S/4HANA Cloud, private edition

- Primavera P6 on-premise version 16 and higher

- Primavera P6 Cloud version 19.12.5 and higher

Available on **Industry Cloud**

Available on **SAP Store**
